Germany

Uganda

Germany

Poland

Estonia

South-Africa

We, a group of ten young people from eight different nations, travelled Norwegian fjords in June 2013. We are from Uganda - South Africa - Estonia - Poland - Bulgaria - Turkey -Cyprus and Germany. We are participants of the international Ice-Climate-Education Youth Camp 2013 organized by Arved Fuchs.

While sailing on board the "RYVAR" we were in pursuit of a common aim: learning about the global warming and understanding the impact of climate change on flora and fauna. During the camp we decided to send a message to the world in form of a virtual drift bottle. Whoever reads this message has "**found**" our drift bottle message and is asked to answer back to the [address given at the end of the drift bottle message](#).

One of the ten participants will answer you.

And this is the message we jointly created sailing along the Sogne Fjord and which we decided to let drift into the Internet:

June 20th 2013 on board of the sailer "Ryvar"

It might not affect you,
it might not affect me directly
but it will affect them.

As you read this message
glaciers are melting,
species are going extinct,
mother earth is suffering.

It's real and it's happening,
don't you hear the cries?

The world will turn and turn
but we are the generation in charge.

The ball is in our court
and the choices are ours.

Take the time and play your part

It's never too late to stop being
a selfish parasite.
It's simple
Play your part now!

Take the lead in maintaining & protecting
our beautiful earth!
